Abstract:
EP 895173 A

The computer system has a number of users computers (11) connected to several server computers (14) by a network (16) e.g. the internet. The computer system has a system for obtaining details of a users requirements.

The system also obtains financial information from the server computers on behalf of the user. A mobile agent (13) is transported over the network to the users computer, for delivering the financial information.

USE - Also for life assurance, pensions and investments, loans and mortgages, and financial planning and advisory services.

ADVANTAGE- Provides system offering user simpler way of understanding product information and applicability.
